**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 – 7 are rejected under 35 U.S.C. 112, first paragraph, because the best mode contemplated by the inventor has not been disclosed. Evidence of concealment of the best mode is based upon the feature of claim 1, page lines 8 – 12, where the coating means and developing means are said to be able to carry the substrate between the first port and second port in addition to performing the coating/developing function. The applicant has not disclosed the means that would enable the coating means and developing means to perform the carrying function as claimed.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2851

5. Claims 1, 3 – 5, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Akimoto (US 5,937,223).

The claims, as best understood in light of the §112 rejection, are met by the reference. The reference discloses a semiconductor manufacturing apparatus having a first and second port (110,130) coupled by developing means and the coating means. The coating means and the developing means are isolated from each other by an intermediate wall. See Fig. 9. The bake units are located opposite the coating and developing means.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2851

8. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Akimoto (US 5,937,223) in view of Ohtani et al. (US 5,963,753).

Akimoto has the basic processing apparatus, but does not disclose a first and second carrier for processing units at different levels. The secondary reference teaches using a plurality of robots (carriers) to reach different levels (H1 – H3). One of ordinary skill in the art would be motivated to increase the number of carriers to improve the throughput of the operation.

***Allowable Subject Matter***

9. Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
